

April 7, 2006 Chateau Raceway Weekly News by Matthew Grage

The scheduled Season Opener for the 50th Anniversary Season of racing at Chateau Raceway was cancelled because of heavy rains that lead to high water on the Cedar River. The rains stopped before noon on Friday and preparations were underway to open the season on schedule. The water and wet conditions were being dealt with however there was no way to deal with the rising water on the river which runs just behind the back straightaway. The river was exceeding flood stage and the forecast was for the river to continue to rise until early Saturday morning so the work preparing the track for racing had to be stopped.

The new track ownership "Four Link Promotions" tentatively has plans to hold a test and tune session during the week before another attempt to get the season underway next Friday night. The track will be running its normal five classes of racing....The Chateau Pure Stocks, Classic Dwarf, The Power 96 WISSOTA Midwest Modifieds, WISSOTA Street Stocks, and Miners Outdoor Open Modifieds. Hot Laps are slated for 7:00 with the racing underway by 7:30.
